

b

What will a Morpeth Partnership Computer Scientist look like?		
	At the end of Year 2 they will have the following knowledge:	At the end of Year 6 they will have the following knowledge:
Being a computer scientist	<p>The National Curriculum for Computing aims to ensure that all pupils :</p> <ul style="list-style-type: none"> <li>• can understand and apply the fundamental principles and concepts of computer science, including abstraction, logic, algorithms and data representation</li> <li>• can analyse problems in computational terms, and have repeated practical experience of writing computer programs in order to solve such problems</li> <li>• can evaluate and apply information technology, including new or unfamiliar technologies, analytically to solve problems</li> <li>• are responsible, competent, confident and creative users of information and communication technology</li> </ul>	<p>The National Curriculum for Computing aims to ensure that all pupils :</p> <ul style="list-style-type: none"> <li>• can understand and apply the fundamental principles and concepts of computer science, including abstraction, logic, algorithms and data representation</li> <li>• can analyse problems in computational terms, and have repeated practical experience of writing computer programs in order to solve such problems</li> <li>• can evaluate and apply information technology, including new or unfamiliar technologies, analytically to solve problems</li> <li>• are responsible, competent, confident and creative users of information and communication technology</li> </ul>
Knowledge	<p>During Key Stage 1, pupils should be taught to:</p> <ul style="list-style-type: none"> <li>• understand what algorithms are, how they are implemented as programs on digital devices, and that programs execute by following precise and unambiguous instructions</li> <li>• create and debug simple programs</li> <li>• use logical reasoning to predict the behaviour of simple programs</li> <li>• use technology purposefully to create, organise, store, manipulate and retrieve digital content</li> <li>• recognise common uses of information technology beyond school</li> <li>• use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies</li> </ul>	
	<p>During Key Stage 2, pupils should be taught to :</p> <ul style="list-style-type: none"> <li>• design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts</li> <li>• use sequence, selection, and repetition in programs; work with variables and various forms of input and output</li> <li>• use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs</li> </ul>	

	<ul style="list-style-type: none"> <li>• understand computer networks, including the internet; how they can provide multiple services, such as the World Wide Web, and the opportunities they offer for communication and collaboration</li> <li>• use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content</li> <li>• select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information</li> <li>• use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact</li> </ul>
--	---

### Progression of key skills from Y1 - Y13

	Computer Science	Information Technology
End of Year 1	<ul style="list-style-type: none"> <li>• To understand what algorithms are</li> <li>• To create simple programs</li> </ul>	<ul style="list-style-type: none"> <li>• To use technology purposefully to access, create, store and retrieve digital content</li> <li>• To use technology safely &amp; to understand the need to keep personal information private</li> <li>• To recognise common uses of information technology beyond school</li> </ul>
End of Year 2	<ul style="list-style-type: none"> <li>• To understand that algorithms are implemented as programs on digital devices</li> <li>• To understand that programs execute by following precise and unambiguous instructions</li> <li>• To use logical reasoning to predict the behaviour of simple programs and debug simple programs</li> </ul>	<ul style="list-style-type: none"> <li>• To use technology purposefully to access, organise, edit and manipulate digital content</li> <li>• To use technology respectfully and identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies</li> </ul>
End of Year 3	<ul style="list-style-type: none"> <li>• To write and debug programs that accomplish specific goals</li> <li>• To use sequences in programs</li> <li>• To work with various forms of input and output</li> </ul>	<ul style="list-style-type: none"> <li>• To use search technologies effectively</li> <li>• To use a variety of software to accomplish given goals</li> <li>• To collect information</li> <li>• To design, create and present content</li> <li>• To use technology responsibly and identify a range of ways to report concerns about contact</li> </ul>

End of Year 4	<ul style="list-style-type: none"> <li>• To design, create and to use logical reasoning to debug programs that accomplish specific goals</li> <li>• To use repetition in programs</li> <li>• To control or simulate physical systems</li> <li>• To understand how computer networks can provide multiple services, such as the world wide web</li> <li>• To appreciate how search results are selected</li> </ul>	<ul style="list-style-type: none"> <li>• To select a variety of software to accomplish given goals</li> <li>• To select, use and combine internet services</li> <li>• To analyse and evaluate information</li> <li>• To collect and present data</li> <li>• To understand the opportunities computer networks offer for communication</li> <li>• To identify a range of ways to report concerns about content and recognize acceptable and unacceptable behaviour</li> </ul>
End of Year 5	<ul style="list-style-type: none"> <li>• To solve problems by decomposing them into smaller parts</li> <li>• To use selection in programs</li> <li>• To work with variables</li> <li>• To use logical reasoning to explain how some simple algorithms work and detect and correct errors in algorithms</li> <li>• To understand computer networks including the internet</li> <li>• To appreciate how search results are ranked</li> </ul>	<ul style="list-style-type: none"> <li>• To combine a variety of software to accomplish given goals</li> <li>• To select, use and combine software on a range of digital devices</li> <li>• To analyse and evaluate data</li> <li>• To design and create systems</li> <li>• To understand the opportunities computer networks offer for collaboration</li> <li>• To be discerning in evaluating digital content</li> </ul>
End of Year 6	<ul style="list-style-type: none"> <li>• To use computational abstractions</li> <li>• To model state of real world problems</li> <li>• To use a programming language to solve computational problems</li> <li>• To understand simple Boolean logic</li> <li>• To understand how numbers, text and pictures can be represented in binary</li> </ul>	<ul style="list-style-type: none"> <li>• To undertake creative projects with challenging goals</li> <li>• To use multiple applications and work with applications across a range of devices</li> <li>• To collect data</li> <li>• To understand a range of ways to use technology respectfully and safely</li> <li>• To recognise inappropriate content, contact, conduct and know how to report concerns</li> </ul>

End of Year 7	<ul style="list-style-type: none"> <li>• To model behaviour of real world problems</li> <li>• To make use of appropriate data structures</li> <li>• To design modular programs that use procedures or functions (Scratch - block based)</li> <li>• To understand the hardware components &amp; software that make up computer systems</li> <li>• To understand how instructions are stored by computer systems</li> </ul>	<ul style="list-style-type: none"> <li>• To analyse data</li> <li>• To meet the needs of known users</li> <li>• To protect online identity and privacy</li> <li>• To reuse digital artefacts for a given audience and attend to usability of digital artefacts</li> </ul>
End of Year 8	<ul style="list-style-type: none"> <li>• To develop modular programs that use procedures or functions</li> <li>• To use at least one additional programming language (Python - text based) to solve real world problems</li> <li>• To understand uses of Boolean logic in programming</li> <li>• To understand how text, sound and pictures can be manipulated digitally in the form of binary digits</li> <li>• To evaluate computational abstractions</li> </ul>	<ul style="list-style-type: none"> <li>• To understand a range of ways to use technology securely and responsibly</li> <li>• To revise digital artefacts for a given audience and attend to their trustworthiness</li> <li>• To combine multiple applications to achieve challenging goals</li> </ul>

End of Year 9	<ul style="list-style-type: none"> <li>• To design computational abstractions</li> <li>• To be able to carry out simple operations on binary numbers</li> <li>• To model state and behaviour of physical systems</li> <li>• To use logical reasoning to compare the utility of alternative algorithms for the same problem</li> <li>• To understand uses of Boolean logic in circuits</li> <li>• To understand how computer system components communicate with one another and how computer systems communicate with other systems</li> <li>• To understand how instructions are executed by computer systems</li> <li>• To understand several key algorithms that reflect computational thinking</li> <li>• To understand how sounds can be manipulated digitally in the form of binary digits</li> </ul>	<ul style="list-style-type: none"> <li>• To repurpose and create digital artefacts for a given audience</li> <li>• To select multiple applications to achieve challenging goals</li> </ul>
End of Year 11		

End of Year 13		
-------------------	--	--

### Computer Science concepts

At the end of Key Stage 1, the pupils will have developed an understanding of the following computing concepts;	At the end of Key Stage 2, the pupils will have developed an understanding of the following computing concepts;	At the end of Key Stage 3, the pupils will have developed an understanding of the following computing concepts;
Program (algorithm), Logical reasoning, Instructions, Debug, Information retrieval, manipulation, Online, Internet, Digital, Software, Hardware, Login/out,	Program (algorithm), Logical reasoning, Instructions, Debug, Information retrieval, manipulation, Online, Internet, Digital, Software, Hardware, Login/out, Design, Input, Output, Sequence and Repetition, Network, WWW, Analyse and Evaluate, Search, Browser, Control, Physical Systems, Simulate,
